DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of claims 40-51 of Group I in the reply filed on 1/7/08 is acknowledged.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 40-51 are rejected under 35 U.S.C. 102(b) as being anticipated by McNelley et al (P.N.5,550,754).

McNelley et al disclose a portable video phone system that shows all the limitations recited in claims 40, and 51, including the feature of obtaining a first set of visual data associated with the event using a first recording unit (See McNelley et al's Figure 8, where it is shown a video phone means having the capability of obtaining and recording visual data of a surrounding area), the feature of obtaining a second set of visual data associated with the event using a second recording unit, the second recording unit being physically separate from the first recording unit (See the capability of establishing a video telephone conversation between a first party and a second party as shown in McNelley et al's claim 1, lines 1-4; therefore, the two parties in conversation can be obtaining and recording visual data of the same surrounding area while they are disposed at a distance between each other), and the feature of transmitting the first set

Application/Control Number:

10/764,309 Art Unit: 2621

of visual data to the second recording unit as specified in the present claims 40, and 51. (See McNelley et al's column 22, lines 41-51).

With regard to claim 41, the feature of displaying the first set of visual data on the recording medium as specified thereof would be present in cited reference of McNelley et al. (See McNelley et al's column 22, lines 19-22).

With regard to claims 42-43, the feature of transmitting wirelessly the first set of visual data to the second recording unit as specified thereof is present in McNelley et al. (See McNelley et al's column 7, line 66, to column 8, line 9).

With regard to claim 44, the feature of transmitting an identifier indicating an origin of the first set of visual data as specified thereof is present in McNelley et al. (See McNelley et al's claim 15).

With regard to claim 45, the feature of storing the first and second set of visual data as specified thereof is present in McNelley et al. (See the capability of recording visual data from both parties as shown in McNelley et al's claim 15, and claim 17, lines 1-8).

With regard to claim 46, the feature of selectively storing one of the two sets of visual data as specified would be present in McNelley et al. (See the capability of recording visual data from both parties as shown in McNelley et al's claim 15, and claim 17, lines 1-8, and the recording controller shown in McNelley et al's Figure 8, component 188).

With regard to claim 47, the feature of the visual data being compressed as specified thereof is present in McNelley et al. (See McNelley et al's column 18, lines 43-48).

With regard to claim 48, the feature of coordinating between the first and second recording units to sync the first and second set of visual data as specified thereof would be present in McNelley et al. (See the capability of recording visual data from both parties as shown in McNelley et al's claim 15, and claim 17, lines 1-8, and the recording controller shown in McNelley et al's Figure 8, component 188).

With regard to claim 49, the feature of transmitting audio data from one of the recording units to the other as specified thereof is present in McNelley et al. (See McNelley et al's column 23, lines 6-9).

With regard to claim 50, the feature of displaying the first set of visual data on the second recording unit and switching to display the second set of visual data on the second recording unit as specified thereof is present in McNelley et al. (See McNelley et al's column 22, lines 19-22).

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Thomason discloses a wireless video audio data remote system.

Cvetko et al discloses an interactive multimedia system.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Bob Chevalier whose telephone number is 571-272-

Application/Control Number:
